

Bird Sanctuary · Where the Mountains meet the Sea

New Campus · Aldersgate

- Opportunities —○— Connection to historical society of Pacific Palisades with emphasis on community building and conservation
- Challenges —○— Pests: Rats are common in the city. How can we support desired species but not attract unwanted pests near students. —○— Pest control methods must be strictly reviewed to avoid any animal cruelty or environmental/food chain problems
- Other Insights —○— Unique environment 'Where the mountains meet the sea'. Many birds live in the area

Why?

Environmental Stewardship

- Improving the habitat around our new campus to invite birds
- Birds make us happy
- Birds are beautiful

How?

Nature Society

- Student-led initiative —○— Meeting once a week
presenting to community when there is news or to seek engagement
- Community-building —○— Periodic presentations at Kuyam
- Video production —○— Telling the story visually to engage with greater community

What?

- Hummingbird feeders
- Planting flowers for birds
- Protecting our campus trees for bird habitat
- Educating community about sharing space with birds
